

English Sample Document

This is a sample English document for PDF translation testing.

Introduction

This document demonstrates the capabilities of the PDF Translation Software. The software can extract text from PDF files and translate it into multiple languages using various translation services.

Features

- Supports 100+ languages
- Multiple translation services (Google, Baidu, Microsoft)
- Configurable translation parameters
- PDF and text output formats
- Intelligent text chunking
- Detailed logging and error handling

Usage

The software provides a simple command-line interface for translating PDF documents. Users can specify source and target languages, output formats, and configuration options.

Conclusion

This PDF translation tool makes it easy to translate documents across language barriers, supporting global communication and understanding.
